

# PowerSurge

---

## Background

During September 2011, I met a number of folk who were saying that God was preparing His people for something special, but what?

---

## My thoughts

I spent a number of spare moments meditating on this and found the phrase(or word) "PowerSurge" kept popping into my mind. What did it mean?

As I thought about it, two recent events sprang to mind - the Japanese earthquake and the Indonesian tsunami. Both were events of great power that came with little forewarning and were irresistible. The tsunami in particular swept everything out of its path. The TV images of the huge tidal waves were vivid in my mind.

I was reminded that the first indication of a tsunami is a sudden, dramatic drop in the sea level. Boats are left high and dry where once they were floating in deep water.

And then the wave rushes in. Trees, cars, trucks, bridges, buildings are all swept aside by its overwhelming power. The landscape is changed beyond recognition. Even more than this, the lives of those living there are changed forever. The whole world was shocked and everyone remembers.

## My Interpretation

I think that God is saying that, contrary to popular opinion, the church is not in decline. He has been gathering and preparing His troops for a new surge of His power. It will not be like anything the world has seen before. That which Satan has built will be swept away and there will be a great renewal.
